Office Action Summary

Application No.

09/823,300

Applicant(s)

KOENIG, ERIC

Examiner

Abbas I. Abdulsalam

Art Unit

2677

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05/26/05.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 7,10-13,16,17 and 19-28 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 7,10-13,16,17 and 19-28 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. This office action is in response to a communication (interview summary) conducted on 06/14/05. Claims 7, 10-13, 16-17 and 19-28 are pending, and claims 1-6, 8-9, 14-15 and 18 are cancelled.

Response to Arguments

2. Applicant's arguments with respect to claims 7, 10-13, 16-17 and 19-28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 10-13, 16-17 and 19-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lebby et al. (US Patent 6158884) in view of Ryuji (Japanese Publication # 11-095318).

As to claims 7 and 28, Lebby et al. teaches a handheld wireless telecommunications unit displaying images to a user (integrated communicative watch as portable electronic equipment, column 1, lines 1-9, cellular phone, column 6, lines 58-62) comprising: a hand-held body having a keypad (wristband 26 with numeric keypad 28 as shown in figure 1 A); a display on an upper

Art Unit: 2677

face of said body comprising a first screen (watch face 14 shown in figure 1A, column 3, lines 31-33)

Lebby does not teach “at least one additional screen slidable along tracks mounted on respective opposite edges of said first screen, said at least one additional screen being movable between a first position, wherein the at least one additional screen is stored under said first screen and a second deployed position wherein said at least one additional screen forms a continuous screen with said first screen; and grasping handle extending from a distal edge of said at least one additional screen accessible when said at least one additional screen is stored under said first screen for pulling said at least one additional screen from said first position to said second deployed position”.

Ryuji on the other hand teaches a multiscreen display device (100) including a display unit (20) that is moved to freely slide in a lateral direction on the upper surface of the display unit (10) arranged under the display unit (20) by rotating the mechanisms 21a, 21b and 21c (see the abstract, the last sentence and Fig. 1 (100, 20, 10)).

It would have been obvious for one of ordinary skill in the art at the time the invention was made to modify the display system of a communicative watch shown in Fig. 1A to adapt a sliding movable display (20) as well as rotating mechanisms (21a, 21b 21c) as configured in Fig. 1 because the sliding movable display along with rotating mechanisms helps function a multiscreen display system as taught by Ryuji.

As to claim 10, Ryuji teaches said telecommunications unit is a cellular telephone (Fig. 1 (100), it would have been obvious that the multi-screen display (100) could be used in any display device).

As to claim 11, Ryuji teaches said telecommunications unit is a wireless personal digital assistant (Fig. 1 (100), it would have been obvious that the multi-screen display (100) could be used in any display device).

As to claim 12, Ryuji teaches telecommunications unit is wireless Internet Web based personal electronic organizer (Fig. 1 (100), it would have been obvious that the multi-screen display (100) could be used in any display device).

As to claim 13, Lebby et al. teach said screens are LCD's (Lebby et al., liquid crystal display, column 5, lines 62-63).

As to claim 16, Lebby et al. teach said at least one slidably attached screen is comprises at least one screen attached to a left side of said first screen (Lebby et al. display 27 is slidably attached to wrist face shown in figure 1 A).

As to claim 17, Lebby et al. teach said slidably attached screen is attached to a right side of said first screen (Lebby et al. display 27 is slidably attached to wrist face shown in figure 1 A).

As to claim 19, Lebby et al. teach at least one additional screen is coplanar with said first screen when said at least one additional screen is deployed. (Lebby et al. display 27 is coplanar with wrist face shown in figure 1A).

As to claim 20, Lebby et al. teach said first screen is powered by a first driver electronics circuitry controlled by imaging software and said at least one additional screen is powered by a separate driver electronics circuitry controlled by imaging software (see power source, Fig. 2).

As to claim 21, Lebby et al teach said first and said at least one additional screens are both powered by a common driver electronics circuitry controlled by imaging software (see power source, Fig. 2).

As to claim 22, Lebby et al. teach said first screen displays a first image powered by a first driver electronics circuitry controlled by imaging software and said alt least one additional screen displays a second image powered by a second driver electronics circuitry controlled by imaging software (see power source, Fig. 2).

As to claim 23, Ryuji teaches said first and at least one additional screens display respective portions of a single image (see the abstract, display screens, 20, 30, 40).

As to claim 24, Ryuji teaches said opposite edges of said first screen are respective upper and lower edges of said first screen (see the abstract, display screens, 20, 30, 40).

As to claim 25, Ryuji teaches said at least one additional screen comprises a plurality of screens (see the abstract, display screens, 20, 30, 40).

As to claim 26, Ryuji teaches said at least one additional screen comprises at least one screen attaches to a left side of said first screen and at least one screen attached to a right side of said first screen (see the abstract, display screens, 20, 30, 40).

As to claim 27, Ryuji teaches said at least one additional screen comprises a plurality of screens attached to a right side of said first screen (see the abstract, display screens, 20, 30, 40).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2677

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abbas I. Abdulsalam whose telephone number is (571) 272-7685. The examiner can normally be reached on Monday through Friday from 9:00 A.M. to 5:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bipin Shalwala can be reached on (571) 272-7681. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
